

50-POINT MARKETING AUDIT TEMPLATE

A Comprehensive Performance Marketing, CRO & Analytics Audit Framework

This audit framework is designed by **MACVERSE** for growth-focused brands and e-commerce businesses. It evaluates the four core pillars of high-performing marketing systems: **Traffic Acquisition**, **Conversion Optimization**, **Tracking & Attribution**, and **Marketing Automation**. Use this template to audit your digital infrastructure, identify leaky funnels, and scale predictably.

Pillar 1: Traffic Acquisition & Ads System (Points 1–12)

- | | |
|------|--|
| [1] | Audience Segmentation & Funnel Structure modeling configured correctly across channels. |
| [2] | Meta pixel & Conversions API (CAPI) Event Match Quality score audited and optimized. |
| [3] | Creative Testing Framework established for rapid testing of ad hooks, angles, and formats. |
| [4] | Remarketing campaigns properly segmented to prevent audience overlap and fatigue. |
| [5] | Google Ads search intent mapping ensures bidding only on high-intent transactional keywords. |
| [6] | Performance Max (PMax) campaigns optimized with distinct asset groups and negative keywords. |
| [7] | Google Shopping/Merchant Center product feeds clean, rich in keywords, and error-free. |
| [8] | Technical SEO architecture healthy: Crawling, indexing, Core Web Vitals, and mobile speed checked. |
| [9] | Semantic Content Architecture implemented to map organic keywords to target landing pages. |
| [10] | Local Map listings and Google Business Profile structured and optimized for maximum visibility. |
| [11] | Competitor organic visibility and paid keyword gap analysis performed systematically. |
| [12] | Budget allocation across marketing channels aligned with client acquisition cost (CAC) goals. |

Pillar 2: Conversion Rate Optimization / CRO (Points 13–25)

- | | |
|------|--|
| [13] | Clear and compelling value proposition positioned cleanly above-the-fold on all entry pages. |
|------|--|

[14]]	Mobile-first responsive design audited on multiple real devices to ensure layouts don't break.
[15]]	Page load speed optimized with images compressed, script execution deferred (Target 90+ score).
[16]]	Frictionless lead capture and checkout forms (reduced fields, autofill enabled, inline validation).
[17]]	Clear, high-contrast CTA buttons with single focal actions on each landing page.
[18]]	Client testimonials, reviews, and case study highlights displayed at key decision points.
[19]]	Trust seals, secure checkout badges, and industry certifications prominently placed.
[20]]	Exit-intent and scroll-depth triggered overlays set up to capture abandoning traffic.
[21]]	Friction points and navigational dead-ends removed to keep user attention focused on CTA.
[22]]	Heatmaps and session recordings reviewed to detect user scrolling/clicking anomalies.
[23]]	Multi-step funnel visual checkout steps tracked to isolate conversion drop-off points.
[24]]	Tailored landing pages mapped directly to specific ad creatives and search intent.
[25]]	Direct calendar or scheduler booking links embedded to minimize sales cycle friction.

Pillar 3: Analytics, Tracking & Attribution (Points 26–38)

[26]]	Google Analytics 4 (GA4) properly configured with standard and custom event tracking.
[27]]	Google Tag Manager (GTM) containers clean, structured, and using standardized variables.
[28]]	Meta Conversions API (CAPI) set up server-side to bypass ad-blockers and iOS restrictions.
[29]]	Event Deduplication (Browser Pixel vs. Server CAPI) set up correctly to prevent double counting.

[30]]	Purchase value and revenue tracking fully accurate with correct currency variables.
[31]]	UTM tracking parameters standardized to attribute all inbound leads and sales correctly.
[32]]	First-party data tracking activated for robust custom audience and conversion modeling.
[33]]	Consent Mode V2 implemented to respect user privacy while preserving tracking data.
[34]]	Multi-touch attribution models reviewed (First-click, Last-click, Data-Driven) for channel ROI.
[35]]	Real-time marketing dashboards configured to display consolidated revenue and CPA metrics.
[36]]	Cross-domain tracking implemented cleanly where multiple domains/subdomains are used.
[37]]	Bounce rates, session durations, and engagement rate anomalies actively audited.
[38]]	Clean and accurate datalayers pushed to match standard schemas for robust tracking.

Pillar 4: Lifecycle Marketing & Automation (Points 39–50)

[39]]	Behavioral email marketing nurturing flows (Welcome series, lead nurture) fully active.
[40]]	CRM automated lead scoring systems implemented to prioritize high-intent prospects.
[41]]	Instant sales routing and auto-alerts configured for sales reps upon new lead arrivals.
[42]]	Cart abandonment and checkout recovery email/SMS triggers set up.
[43]]	Post-purchase feedback and customer satisfaction loops automated.
[44]]	Interactive chat or AI chatbot pre-qualifies traffic before routing to human reps.
[45]]	n8n, Zapier, or Airtable integrations built to synchronize cross-platform marketing data.

[46]	Customer Lifetime Value (LTV) cohort analysis implemented to measure long-term value.
[47]	GDPR, HIPAA, and industry-specific privacy compliance regulations fully integrated.
[48]	Continuous automated backup and database security architectures audited regularly.
[49]	Internal marketing team operations streamlined with unified project dashboards.
[50]	Weekly/monthly KPI report deliveries fully automated to stakeholders.
